

SOC2830 Extra Credit # 2 Due Monday at the beginning of the exam.

Find an article with a confidence interval and identify:

Research question and population of interest;

Sample size;

Sampling procedure (i.e., the selection process used);

Confidence level (i.e., alpha level or error level);

Confidence interval (i.e., upper and lower bounds);

Critique - one paragraph should do. Let me know your opinion on each of the above items and why.

Copy only the pages from the article that identify the items listed above and circle or highlight the information. Your critique will be page 1, typed and double spaced.
